

The Trash Rat!

©2008 by Chris Lozzi

Look at that kooky neighbor putting all his yard waste-- and even flower pots filled with dirt--out for the garbage! Doesn't he know Foster is way over its trash tonnage limit?

If he would just dump it in the WOODS which is already filled with leaves, dirt and sticks, it would save the taxpayers money, and save him money on trash bags!

There's the Trash Rat! I bet he has something to do with this!

*Don't blame me!! It's not my fault
people don't know any better!
Besides, more for me!*
